

INLINER OF THE FUTURE SEAL-CUT

Seal Cut

The new high-speed Seal-Cut sealing system for plastic film offers an original, innovative solution for machine direction sealing. The Seal-Cut is capable of producing high quality, sealed edges in a wide variety of film applications.

The Seal-Cut provides consistency, which is very important in inline extrusion, while keeping the cost low. The stand-alone design allows it to be free standing or easily attached to existing converting equipment, blown film extruders, bag-making machines and rewinders.

Performance and Benefits

- ★ **Fastest Line Speeds in its Class - Up to 820ft/min (250m/min)**
- ★ **Film Thicknesses up to .006 inches (150 microns)**
- ★ **Low or No Static Build up of the Film**
- ★ **Simple Design Concept**
- ★ **Low Cost**
- ★ **Consistent and Reliable**
- ★ **Convert Master Rolls into Several Smaller Sized Rolls**
- ★ **Reduce Production & Equipment Costs**
