

POLYWEST

SLEEVE SYSTEMS

SYSTEMBOX

Transport and Storage System

Does this sound familiar?

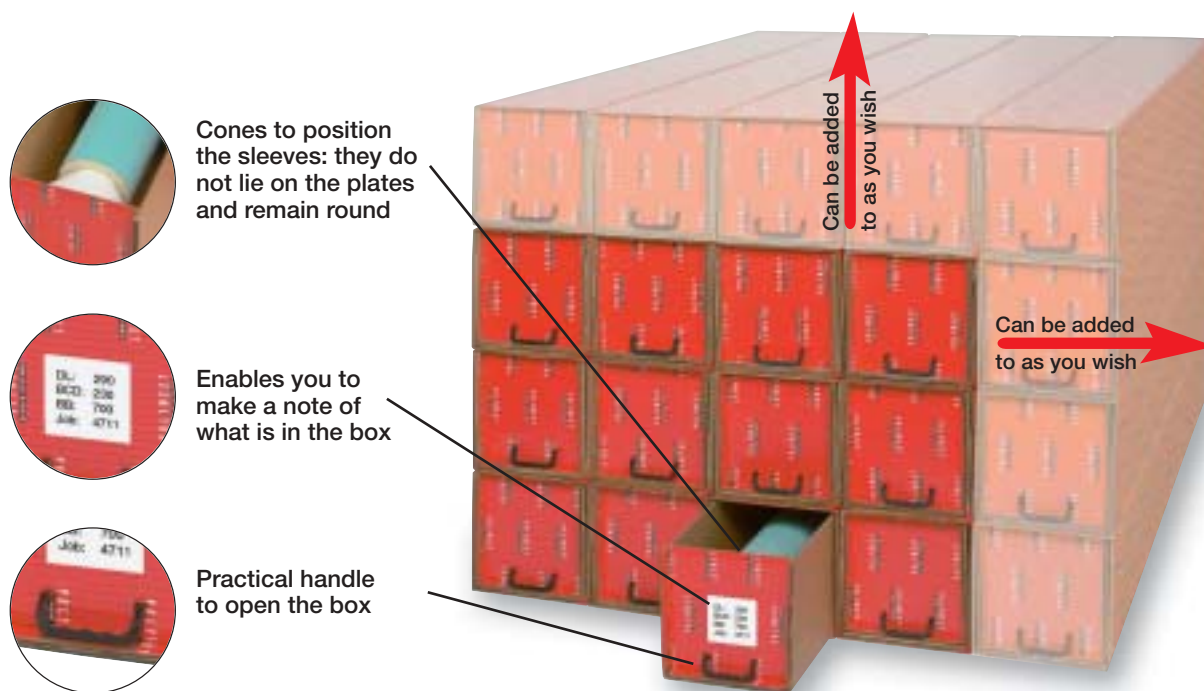

Hundreds of sleeves just lying around waiting for someone to knock one over. The ensuing carnage is similar to that which can be achieved with a row of dominos. Unfortunately this is not such a rare occurrence when expensive sleeves are stacked or hung from the wall on broomstick handles.

Some believe the only way to solve this problem is to purchase expensive, highly mechanised storage systems. These kinds of systems invariably end up being too large or small for your requirements.

Our storage system grows as you need it to.

The sleeves can be delivered either in single or multiple boxes or the **SYSTEMBOX** - it's your decision. The **SYSTEMBOX** enables you to expand your storage system sleeve by sleeve. Your sleeves are always safe and not exposed to light.

Definitely a good solution!
