

# waterline

ritemed

Automatic, high speed  
servo controlled pouchmaking  
machine for medical pouches

3-side-seal pouches  
Tyvek® pouches  
Chevron pouches  
Vented film bags  
Unvented film bags  
Header bags  
Breather bags  
Specialty pouches

# rite-med

The most technological pouch making machine in the medical field with customized solutions able to make 3-side-seal pouches, chevron pouches, vented film bags, unvented film bags, header bags, breather bags, specialty bags and specialty pouches, using aluminium foil, paper, LDPE, HDPE, Tyvek® and combined materials.

Thanks to a special medical package tested for cleaning room environment and to an extended powerful software with innumerable report capabilities the machine is constantly under control for your customer validation.

## Main Components

- Driven 3" or 6" airshafts with edge guide correction
- Edge guide sensors
- Linear dancers with linear sensor
- Servo driven sealing-cooling stations
- Servo driven sealing-cooling platens
- Multi-zone heating
- Rotary cutting blades
- Servo driven feed stations
- Punching stations
- Servo driven long life guillotine blade
- Antistatic bars
- Exit conveyor with stacking gate
- Color touch screen PC

## Optionals

- Special unwinder frame up to 5 reel reception
- Print synchronization
- Load cells
- Fast changeout system
- Impulse sealing

## Available working width:

- 600mm
- 900mm
- 1200mm
